MIC Water Treatment Division

We provide advanced water treatment methods to improve water resources to our clients. We promote pollution free and eco friendly water treatment methods to ensure suitable results.

We offer turnkey solutions with operation & maintenance, technical support and after sales services.

We are proud of being an exemplary institution in the water treatment industry with trained and experienced staff.

It is our Endeavour to preserve the environment by not only treating the effluent and rendering it environment-friendly but also reusing waste-water and reducing discharge volume as much as practicable by adopting the latest developments in water treatment technology.

MIC Water & Waste Water Treatment Plants are the best choice of our customers across the nation because of number of factors, which is as follow:

Recycle
Small size
Easy installation
Service support after supply

Portable
Equipped with latest technology
Experienced and expert team
Automatic

Aesthetic outlook
Operating without odor and noise
Qualitative products
Cost-effective products/services

Latest Technologies, Energy Recovery System & 0 % Pollution

PRODUCTS RANGE

WE OFFER WIDE RANGE OF PRODUCTS SOME OF WHICH ARE LISTED BELOW

Sewage Treatment Plant (STP)

Activated Carbon Filter (ACF)

Softener Filter Plant (SF Plant)

Water Treatment Plant (WTP)

Nano Filtration System (NFS)

Leachate Treatment Plant (LTP)

Reverse Osmosis Plant (RO Plant)

Continuous Electro De-ionization (CEDI)

Ultra Filtration System (UFS)

UV Systems (UV)

MIC provides suitable solution for water management starting from Planning, Turnkey basis for Setting up the Plant with Testing & Commissioning along with Maintaining the Plant for;

APARTMENTS

HOSPITALS

HOTELS & RESORTS

INDUSTRIES

DRINKING WATER SECTOR

LABOR CAMPS ETC.

INCOMPARABLE SOLUTIONS FROM MIC

- Environmental Friendly Systems
- Energy Recovery System which produce with the latest technology, It is used in our all System. Thus, Energy Cost is minimized.
- Constant Output quality regardless of feed quality
- Compact plant size
- Capable of exceeding regulatory standards of water quality, achieving 90-100% pathogen removal
- Mobile System

BIO PACK

Package Treatment Plants are easy and fast to build and install. Domestic wastewater consists of water coming from the toilet, sink, shower and cleaning. These types of wastewater can be used in the garden, Toilet, Constructions, Floor cleaning & Laundry after Treatment

EKOTANK®
